CTERA Administrator Training

The CTERA Administrator Training is designed to equip you with an understanding and essential skills to effectively initiate and manage CTERA solutions from the foundational level. This training offers a blend of theoretical knowledge and practical experience, a crucial stepping stone for professionals seeking to solidify their skills in cloud storage management and efficiently manage and administer a CTERA environment (a nominal fee applies).

CTERA Administrator Training Overview

Online, self-paced – The training materials, lab platform and exam are available online, allowing you instant access and the ability to complete your certification at your convenience.

Remote lab – The training comes with full access to a remote lab with a CTERA environment and includes hands-on exercises for you to complete as you work through the course.
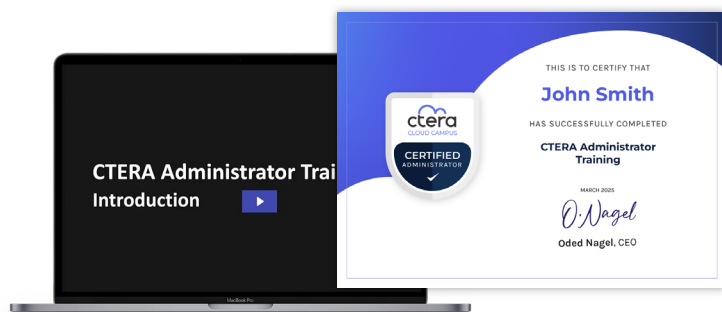

Demos – These are presented throughout the training by our expert CTERA instructor.

Certification – Upon completing the training and passing the exam, you'll be awarded a CTERA Administrator certificate and will be successfully able to manage and administer a CTERA Portal.

Course Length – 4 days

The CTERA Administrator Training includes a comprehensive curriculum comprising 9 modules:

1. Training Introduction
2. Overview of the CTERA product suite
3. CTERA Portal Global administration
4. CTERA Portal Team administration
5. CTERA Edge Filer administration
6. CTERA Endpoints
   - CTERA Drive Connect
   - CTERA Drive Share and Drive Protect
   - CTERA Mobile
7. Portal and Edge Filer troubleshooting
8. BC/DR considerations
9. Introduction to CTERA SDK
